

Points scored

At 100 vs 100 nodes, the bots were mostly evenly matched with bot 1 winning more but not by an intense lead which is significant as bot 1 has a small advantage going first. Bot 1 performed better with 100 vs 400 nodes but not to an intense degree. For 100 vs 700 and 100 vs 1000 the bot 2 began to take a lead over bot 1 even without going first. It's noticeable that with more nodes in the node tree the bot will perform better, but does not mean it will be intensely better than weaker bot as player 1.
